## 図 E Thermal automotive Mini-CBE 1626-...

## Description

Single pole, thermal miniaturised circuit breaker designed for automotive applications. Fits into fuse blocks designed to ISO 8820-3, Type F.

Automatic reset (for DC 12 V only) and open circuit (modified reset to SAE) version optional. Open circuit version ensures contacts staying open as long as power is on. The circuit breaker will reset after the load is removed. Particularly suitable for installation in inaccessible locations.

Current ratings correspond to those of blade fuses. Clear colour coding of the ratings: blade fuse and circuit breaker of the same colour have the same rating.

Breakers rated 7.5 A through 30 A have a fast characteristic curve and only hold 70 % of their rated current continuously.

### **Typical applications**

Protection of electrical systems of passenger cars, trucks, buses, watercraft, extra low voltage wiring systems.

|   | approx. 3 g   |  |  |  |  |

It is good practice to switch off the vehicle's ignition system before manually releasing or re-setting the circuit breaker. Free travel of the actuator must be ensured.

All dimensions without tolerances are for reference only. In the interest of improved design, performance and cost effectiveness the right to make changes in these specifications without notice is reserved. Product markings may not be exactly as the ordering codes. Errors and omissions excepted.

## Internal connection diagrams

Typical time/current characteristic curve at +23 °C / +73.4 °F

The time/current characteristic curve depends on the ambient temperature prevailing. In order to eliminate nuisance tripping, please multiply the circuit breaker current ratings by the derating factor shown below. See also section 9 – Technical information.

| Ambient temperature | °F | -40   | -22  |      | +14  | +32  | +50  |
|---------------------|----|-------|------|------|------|------|------|
|                     | °C | -40   | -30  | -20  | -10  | 0    | 10   |
| Derating factor     |    | 0.73  | 0.78 | 0.82 | 0.86 | 0.91 | 0.95 |
| Ambient temperature | °F | +73.4 | +104 | +122 | +140 | +158 | +185 |
|                     | °C | 23    | 40   | 50   | 60   | 70   | 85   |
| Derating factor     |    | 1     | 1.09 | 1.16 | 1.25 | 1.33 | 1.43 |
