PROFILE

Mated

The SMB snap-on subminiature coaxial connectors provide a fast and reliable connection for high density packaging for applications up to 4 GHz.

Radiall offers a very large range of SMB connectors, including cable plugs and jacks with bulkhead and panel mount configurations, bulkhead and panel mount receptacles; through hole, SMT and edge card receptacles and in-series and between series adapters.

The SMB series also features versions with lower mating forces than standard. Four types of interconnection mechanisms are available:

- **SMB: standard** snap-on connection

The design permits quick engagement and disengagement.

- **SMB limited detent (SMB-A):** snap-on connection with **low mating force**

The design permits quick engagement and disengagement and is suitable for printed circuit boards. Radiall offers a range of PCB and bulkhead receptacles with female center contact.

The SMB-A receptacles are completely intermateable with standard SMB jacks.

- **SMB slide-on (SUBGLIS):** slide-on connection

The design is suitable for back plane and blind mate applications. In this case, we recommend the association of a mobile connector (floating jack / receptacle) with a fixed connector (panel plug / jack, receptacle).

The SUBGLIS connectors are completely intermateable with standard SMB and SMB-A connectors and for that, they can be used for test applications.

- **SMB Lock:**

Plugs (with female center contact) have a coupling nut allowing a reliable lock-on connection (50 N min). This range allows a visual control of the locking system.

These four types of SMB connectors have the same electrical performances.

INTRODUCTION

RADIALl proposes new SMB LOCK plugs with a 2 step connection system:

- 1 Snap the plug on the male connector (fig. 1),
- 2 Lock the couple by pushing down the coupling nut (fig. 2).

This new range

- is **totally intermateable** with the standard SMB male connectors,
- benefits from a low intermodulation,
- replace the standard SMB and screw-on connectors in all applications requiring:
 - a fast connection
 - a reliable lock-on connection
 - long durability

- Possibility to visually control the locking system.

- The connector allows a 360° cable rotation.
- Coupling nut.

The coupling nut is made with POM (halogen free). Its standard color is black.
